

HSS Cut Zone System

McLANAHAN CORPORATION NOW OFFERS THE HSS CUT ZONE SYSTEM

The HSS Cut Zone System can be integrated into any cross-belt sampler installation to improve precision of sample collection, transfer point applications, or it can be used in load zone applications to prevent the escape of fugitive materials. Whether it is a new or existing installation, our experienced staff of design engineers can customize an HSS Cut Zone System for the toughest of applications.

HSS CUT ZONE ADVANTAGES:

- Custom Engineered To Accommodate Any Application
- Maximizes Support In The Cross-Belt Cut Zone For Precise Sample Increments
- Enhances Conveyor Belt Profile To Match Sample Cutter Arc
- Reduces Fugitive Material From Escaping The Cut Zone Or Load Zone Or Transfer Point
- Designed To Integrate With Any Idler Manufacturer
- Integral Height Adjuster For Precise Calibration During Field Installation
